Subject: Q3 Update — 28% growth, first enterprise customer, and next steps

Hey [INVESTOR]

Hope you're well! I wanted to share a quick snapshot of what's been happening at LargeCo this quarter as we continue growing and fine-tuning our AI-driven approach to cybersecurity.

TL;DR

- Revenue up 28% QoQ
- Closed first enterprise deal (Acme Robotics)
- Burn steady; runway 15 months
- Launching automated threat detection dashboard next month

What does LargeCo do?

LargeCo uses AI to identify, predict, and neutralize emerging cyber threats before they hit. We help security teams move from reactive defense to proactive prevention – with less manual effort and faster insights.

Updates & lessons learned Q3

- Closed our first enterprise deal but learned our deployment process needs streamlining – revamping our onboarding process now
- Early data shows customers love our anomaly detection accuracy (92% true positive rate).
- Adjusting pricing after seeing 20% of prospects pause at the pilot-to-contract stage.

Strategies & experiments this quarter

- Running a pilot with two MSPs to integrate automated threat reports into their client dashboards.
- Testing real-time alerts for security events.
- Exploring partnerships with endpoint protection providers

Ask

We're looking for 3–4 CISOs or Heads of Security for short product interviews. If you know anyone, please reply or intro them directly.

Thanks for the continued support —

Matt
